Why we chose this company

- Clear equity story: **market leader** with pricing power and a scalable cost base
- A market that underestimates **margin expansion and cash generation**
- Valuation gap we can **quantify and stress-test** in scenarios

How we worked

- Bottom-up model: **locations x volume x price** per segment, IFRS 16-consistent DCF
- Reverse DCF, **consensus gap**, peers, scenarios and 30 integrity checks
- Every number in this deck ties back to **one Excel model**

Company overview

Example Company ASA – the Nordic leader in subscription-based consumer services

Example Company ASA is the **#1 operator in the Nordics** with ~15% market share, **779k subscribers** and 217 locations. A **recurring revenue model**, proven **pricing power** and a scalable cost base support **~19% EBIT margins** and **ROIC well above WACC**.

Company snapshot 1

Sector	Consumer services
Headquarters	Oslo, Norway
Listing	Oslo Børs (EXMPL)
Subscribers (2025)	779k
Locations (2025)	217
Employees (FTE)	3,730
Market cap (NOKm)	10,370
Enterprise value (NOKm)	11,445

Scalable model with pricing power 2

- **Recurring revenue:** ~90% of sales from monthly subscriptions
- **Pricing power:** price/mix has added 4-5% p.a. since 2022
- **Operating leverage:** EBIT adj. margin up from 12.1% (2021A) to 17.5% (2025A)
- **Capital light:** capex 5.0% of sales and negative working capital

Market overview

A NOK 37bn Nordic market growing ~4% p.a. – Example Company is positioned to keep outgrowing it

Nordic market size (NOKbn)

1

Consistently outgrowing the market

2

Opportunities

- **Price increases above CPI** backed by product tiers
- **Premium concepts** lift revenue per subscriber
- **Bolt-on M&A** in Denmark & Finland

Disruption

- **Digital-only offerings** – countered with an app included in all tiers
- **Data-driven pricing** to reduce churn

Fragmented market – #1 with ~15% share

3

Structural tailwinds support demand

4

Threats

- **Low-cost competitors** could cap pricing power
- **Weaker consumer spending** if interest rates stay high

Financials and estimates

New locations, like-for-like and price drive a 6.0% revenue CAGR 2025–30E, with EBIT margins expanding to 19%

Financial summary (NOKm)

1

	Historical			Forecast				
	2023A	2024A	2025A	2026E	2027E	2028E	2029E	2030E

Financial commentary

4

- **6.0% revenue CAGR 2025–30E:** new locations add ~2.3pp, like-for-like ~0.8pp and price/mix ~2.9pp p.a.
- **Operating leverage** lifts EBIT adj. margin from 17.5% to 18.6% as fixed costs and rent grow with inflation and locations, not with sales
- **Growth is paid for:** 32 openings at ~NOK 22m each lift capex to 7.7% of sales (5.0% in 2025A)
- **Highly cash generative:** ~51% of EBITDAaL converts to FCFF; negative working capital funds growth
- **ROIC of 23% by 2030E** – far above our 9.0% WACC
- **Shareholder returns:** payout from 65% to 85%; cash above 0.75x NIBD/EBITDAaL funds buybacks – NOK 929m over 2026–30E

Growth: new locations, like-for-like, price

2

Revenue by scenario (NOKm)

3

Our estimates vs. consensus

5

vs. consensus	2026E	2027E	2028E
Revenue	+0.5%	+1.5%	+2.5%
EBITDA	+1.0%	+2.5%	+4.0%
EBIT	+1.5%	+3.5%	+6.0%
EPS	+2.0%	+5.0%	+8.5%

Where we differ – margins. Consensus: Flat margins: cost inflation eats the price increases. We: EBIT margin expands as fixed costs are spread over more locations and revenue per location grows with price.

Valuation and recommendation

We recommend BUY with a target price of NOK 146 – 20% upside and 24% expected total return

Our take: at NOK 122 the market prices in an EBIT margin of **17.1%** in 2033E – below the 17.5% Example Company earns today. We see **19.1%** as fixed costs are spread over more locations. DCF NOK 139 and peers NOK 136 both point higher: **12-month target price NOK 146(1), BUY.**

BUY – TP NOK 146

- **Quality at a discount:** trades at 11.3x 2027E EV/EBIT, 11% below peers despite higher margins
- **Growth engine intact:** new locations, like-for-like and pricing all contribute; bolt-on M&A is upside
- **Cash machine:** FCF yield rising to 8% by 2029E funds rising dividends
- **Asymmetric risk/reward:** bull NOK 201 vs. bear NOK 62 per share (DCF)
- **Catalysts:** next quarterly report (price increases), capital markets day, bolt-on M&A

Valuation summary – football field (NOK/share)

Key DCF assumptions

- **Valuation date** 16.09.2026 – only 29% of 2026E FCFF is included (stub); **mid-year** discounting
- **Terminal value:** Gordon growth with $g = 2.0\%$ and value-driver reinvestment (RONIC 12%) – implied exit multiple 7.7x EV/EBITDAaL
- **Lease consistency:** FCFF after lease payments, WACC and net debt excl. leases (pre-IFRS 16 basis)
- **Sensitivity:** $\pm 0.5\text{pp}$ WACC moves the value by NOK 10.2–11.7 per share; $\pm 0.25\text{pp}$ terminal growth by only NOK 1.2–1.3 (RONIC above WACC)

WACC

What the market is pricing in

At NOK 122 the market prices in an EBIT margin of 17.1% in 2033E – below the 17.5% earned in 2025A; our base case is 19.1%

Market-implied vs. our base case

	Market-implied	Our base case	Difference	Reference
EBIT adj. margin, 2033E	17.1%	19.1%	–2.0pp	17.5% (2025A)
EBIT adj. margin, forecast average	16.4%	18.4%	–2.0pp	16.4% (3y avg.)
Revenue CAGR, 2025A–2033E	4.6%	5.4%	–0.7pp	8.4% (2022–25A)
... EBIT margin at that growth	17.6%	19.1%	–1.4pp	
WACC	9.87%	8.99%	+0.9pp	
Terminal growth	–3.35%	2.00%	–5.4pp	

How to read it

- **Margins:** the share price discounts an EBIT margin of 17.1% in 2033E – below today's 17.5%. Our 19.1% rests on operating leverage from a largely fixed cost base.
- **Growth:** or revenue growth of 4.6% a year instead of our 5.4% – with our cost base that also means a margin of 17.6%.
- **Discount rate:** or a WACC of 9.9% (ours 9.0%).
- **What it is worth:** each percentage point of EBIT margin in every year is worth **NOK 8.6 per share** – the upside rests on margins, not on multiples.

DCF value per share vs. EBIT adj. margin in 2033E (NOK)

The line crosses today's share price at an EBIT margin of 17.1% (red point). Our base case of 19.1% (navy point) gives NOK 139 per share. Each point on the line shifts the margin by the same amount in every forecast year and the terminal year.

Scenario analysis

Bear-to-bull DCF range of NOK 62–201 per share; probability-weighted value of NOK 135

Scenario assumptions and outcomes

Thesis tracker – what would make us wrong

All 5 kill criteria are on track on the 2025A actuals – we would change our view if any of them is breached

Kill criteria

KPI	Kill if	Threshold	Latest (2025A)	Base case (2026E)	Watch zone	Status	Base case check
Price/mix growth, group	below	1.5%	4.4%	3.3%	1.0%	ON TRACK	OK
Like-for-like volume growth, group	below	-0.5%	0.4%	1.0%	0.5%	ON TRACK	OK
EBIT adj. margin	below	16.0%	17.5%	17.5%	1.0%	ON TRACK	OK
Cash conversion (FCFF / EBITDAaL)	below	40.0%	62.1%	48.8%	10.0%	ON TRACK	OK
NIBD / EBITDAaL	above	1.50x	0.83x	0.75x	0.25x	ON TRACK	OK

Watch zone: the distance to the threshold that turns the status from ON TRACK to WATCH. Base case check: our own forecast for next year must not breach the criterion.

Scenario signposts – what has to happen, and what we watch

Bear · NOK 62 per share · 25%	Base · NOK 139 per share · 50%	Bull · NOK 201 per share · 25%
Story: Low-cost chains take share in the big cities: price increases stall, churn rises and the roll-out slows What has to happen: Two or more low-cost openings per quarter in our core cities and price/mix below +1.5% for two quarters Watch: Group price/mix growth and churn in the quarterly reports	Story: Steady like-for-like growth, around seven openings a year and operating leverage from a largely fixed cost base What has to happen: Annual price increases of ~3% stick and new locations reach 75% of mature volume in their second year Watch: Revenue per location and the ramp-up of the 2026 openings	Story: Faster roll-out and premium tiers: more openings at similar returns and higher revenue per member What has to happen: The capital markets day lifts the opening target and premium tiers pass 25% of members Watch: Opening pipeline and premium share at the capital markets day

Where we differ from consensus

Our 2028E EBIT is +6.0% vs. consensus and EPS +8.5% – the gap widens every year as the operating leverage builds

Our estimates vs. consensus (NOKm, EPS and DPS in NOK)

	2026E ours	2026E cons.	2026E diff.	2027E ours	2027E cons.	2027E diff.	2028E ours	2028E cons.	2028E diff.
Revenue	5,726	5,698	+0.5%	6,084	5,994	+1.5%	6,479	6,321	+2.5%
EBITDA (reported)	1,701	1,684	+1.0%	1,819	1,775	+2.5%	1,956	1,881	+4.0%
EBIT (reported)	1,090	1,073	+1.5%	1,170	1,131	+3.5%	1,268	1,197	+6.0%
EPS	8.57	8.40	+2.0%	9.48	9.03	+5.0%	10.51	9.68	+8.5%
DPS	5.57	5.52	+0.9%	6.64	6.38	+4.0%	7.88	7.36	+7.1%

Consensus recommendations: 4 Buy / 2 Hold / 0 Sell · consensus target price NOK 135 (+11% upside). Green = we are above consensus.

Our variant perception

1. Margins	2. Roll-out	3. Capital returns
We: EBIT margin expands as fixed costs are spread over more locations and revenue per location grows with price Consensus: Flat margins: cost inflation eats the price increases Why: About 60% of personnel and 50% of other opex are fixed; rent grows with inflation and the number of locations, not with revenue Proof – and when: Q4 report (February): 2027 margin guidance. Capital markets day (November): margin target EBIT 2028E: +6.0% vs. consensus	We: Around seven openings a year that reach mature volume in their third year Consensus: Four to five openings a year, no step-up in the pipeline Why: Signed leases for 2026-27 and the integration of the 2024-25 bolt-ons free up management capacity Proof – and when: Capital markets day (November): opening target and pipeline Revenue 2028E: +2.5% vs. consensus	We: Cash above 0.75x NIBD/EBITDAaL goes to buybacks – EPS grows faster than net profit Consensus: Dividends only; leverage drifts down Why: Stated leverage target and a stable, cash-generative subscription model Proof – and when: AGM (spring 2027): buyback mandate EPS 2028E: +8.5% vs. consensus

Sources: Bloomberg consensus (example data – replace), 6 analysts; case team estimates (Excel model, Consensus sheet). Reported IFRS 16 basis. Figures are illustrative.

Growth engine – like-for-like and new locations

32 new locations over 2026E–2030E add ~2.3pp a year, like-for-like ~0.8pp and price/mix ~2.9pp – 6.0% revenue CAGR

Revenue growth by source

Locations (year end) and revenue per location (NOKm)

Location economics – base case

	2025A	2026E	2027E	2028E	2029E	2030E
Locations, year end	217	224	231	238	244	249
Net new locations	+6	+7	+7	+7	+6	+5
Mature-equivalent locations (all segments)	217.0	219.4	224.7	231.4	238.0	243.9
Revenue per average location (NOKm)	25.4	26.0	26.7	27.6	28.5	29.4
Capex per new location (NOKm)	–	22.0	22.6	23.1	23.7	24.3
Growth capex (NOKm)	–	154	158	162	142	122

How a new location matures

- Volume vs. a mature location: **35%** in the opening year, **75%** in year two, **95%** in year three, 100% from year four.
- Rent and staff are paid from day one – openings dilute margins first and lift them as they mature.

Peer group and multiples

Example Company trades at a 11% discount to peers on 2027E EV/EBIT despite a 5pp higher EBIT margin

EV/EBIT 2027E – peers vs. Example Company

Implied value per share from peer multiples (NOK)

Multiple (2027E)	Company metric	25th pct	Median	75th pct	Included
EV / Sales	NOKm 6,084	71	94	110	No
EV / EBITDA	NOKm 1,819	108	125	143	Yes
EV / EBIT	NOKm 1,170	124	139	155	Yes
P / E	NOK 9.48	129	144	158	Yes
Average (included)		120	136	152	

EV/Sales excluded: ignores the company's superior margins.

Sources: Bloomberg consensus as provided in the case material (example data – replace), case team estimates. Multiples at current share prices; EV incl. lease liabilities (IFRS 16 basis).

WACC and key forecast assumptions

9.0% WACC from a peer-based beta; forecast drivers anchored in the historical track record

Cost of capital build-up

Cost of equity	
Risk-free rate (10y NGB)	4.00%
Equity risk premium	5.00%
Unlevered beta (peer median)	0.82
Target D/E	11.1%
Relevered beta	0.89
Size premium	1.00%
Cost of equity	9.47%
Cost of debt	
Pre-tax cost of debt (rf + spread)	6.00%
Tax rate	22%
After-tax cost of debt	4.68%
Capital structure	
Target D / (D+E)	10%
Target E / (D+E)	90%
WACC	8.99%

Peer betas (2y weekly, Blume-adjusted)

Peer	Raw β	Adj. β	D/E	Unlev. β
Peer A ASA	1.05	1.03	28%	0.85
Peer B AB	0.98	0.99	35%	0.77
Peer C A/S	1.12	1.08	42%	0.81
Peer D Oyj	1.21	1.14	55%	0.79
Median (8 peers)	1.06	1.04	36%	0.82

¹ History shows the total cost ratio; the fixed part (Drivers E) grows with inflation and the number of locations instead of with revenue.

Terminal assumptions

Growth 2.0% • RONIC 12% • EBIT margin 19.1% (final forecast year) • Long-term tax 22% • Exit multiple cross-check 8.5x EV/EBITDAaL

Key risks

Operating leverage cuts both ways – our bear case DCF of NOK 62 is 49% below today's share price, against 20% upside to our target price

- 1

Pricing pressure
Low-cost competitors could cap price increases and raise churn.
- 2

Consumer slowdown
Higher rates and inflation could reduce discretionary spending.
- 3

Cost inflation
Wage and energy inflation could delay margin expansion.
- 4

Execution on growth
New locations and digital products may ramp up slower than planned.
- 5

Leverage and M&A
Large acquisitions could add integration risk and debt.

Sources: Case team assessment. Probability and impact are qualitative (1 = low, 3 = high).

How to use this template

From case files to a finished pitch – every number flows from the Excel model (Equity_Research_DCF_Toolkit.xlsx)

Workflow

- 1 Fill the model**
Inputs → Hist (paste the case 'Model' sheet using the mapping on the Guide tab) → WACC → Comps.
- 2 Set your view**
Drivers: base case per year, Bear/Bull adjustments, probabilities and terminal assumptions.
- 3 Check the model**
Checks tab must show ALL CHECKS OK. Understand every warning and switch back to Base.
- 4 Update the deck numbers**
Re-run the deck builder, or copy from the Deck_Feed tab into the tables and charts (right-click chart → Edit Data).
- 5 Write the story**
Replace headlines with your own action titles – one message per slide, backed by numbers.
- 6 Final polish**
Sources on every slide, consistent units, speaker notes rehearsed, appendix ready for Q&A.

Submission checklist

- ☐ Presentation in **English**
- ☐ **Headings unchanged:** Company overview, Market overview, Financials and estimates, Valuation and recommendation
- ☐ **Max 4 content slides** (cover and case-team slide not counted)
- ☐ **Buy / Hold / Sell** and a **target price** clearly stated
- ☐ **Excel model attached** – Checks tab shows ALL CHECKS OK
- ☐ Every number in the deck **matches the model** (scenario = Base)
- ☐ **Sources** cited on every slide
- ☐ Delete this slide and all [placeholders]
